*First Choice Bull Sale*

17<sup>TH</sup> ANNUAL

*Bulls with a  
work ethic*

SELLING 77 SPRING YEARLINGS AND 55 FALL YEARLINGS

**TUESDAY • OCTOBER 10, 2023 • 1 P.M.**

AT THE RANCH NEAR FORT ROCK, OREGON

**Nine Peaks Ranch | Aaron & Rebecca Borrer**  
P.O. Box 38 | Fort Rock, OR 97735 | Phone: (541) 633-3284

Dear Friends,

Welcome to the 9 Peaks Ranch Bull Sale. Every year we spend all year preparing for the big day. This year it seems everything is different. Our industry is seeing unprecedented demand and prices. We've had one of the best feed years ever in Oregon, and now recent rains have provided fall green up.

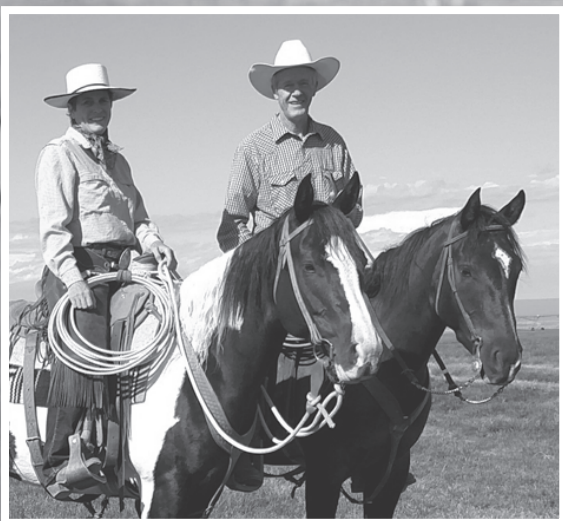

There are still challenges. One huge one in the Angus world is the foot issue. Why are there so many Angus bulls at AI studs with bad feet? Are people so enamored with terminal traits of high marbling or growth that they think these cattle don't need to walk? It reminds me of a conversation I had with a small business owner in Bend last winter. He told me about his friend, whose job it was to travel to China and visit factories and make sure the appliances they made had the proper limitations so they would not last too many years before they failed. Is that what we as Angus breeders are doing? Get the bull through the first breeding season guarantee... and then you cull the bull and have to buy another one? I am including myself in this rant as an Angus breeder, because there have been times in the past when I didn't do enough research or trusted the wrong salesman. The results of that decision means loading cull bulls up and hauling them to town two years later. At least I hauled them to town instead of trimming their feet.

There are now Claw and Angle EPDs based on foot scores turned into AAA. While not 100% accurate, these EPDs make it much easier to identify genetics that are prone to be a problem later on. Breed average for Claw EPD is +0.5. Less than +0.5 is better than average, which is what we are striving for. All the sires we are using are significantly better than breed average. One of my proudest recent moments was when we did our annual trich test of our herd bulls and our vet (who is also a bull customer) was very impressed at the feet on these five and six-year-old home bred bulls. We are proud to have a vet who was raised as a cowgirl and knows what good feet look like. Enough about feet.

The other issue that we feel is often overlooked in favor of growth and carcass excellence is maternal traits. A commercial cow-calf producer needs a cow that breeds early, takes care of her calf, and lasts many years. We cannot provide genetics that make the cow-calf producer more profit by further increasing growth and milk genetics. The nation's commercial cowherd has reached the point where using higher weaning EPD genetics will no longer result in heavier calves weaned by the commercial rancher. The Angus cow is the biggest beef cow in the industry, and making her growthier will simply result in open cows that cannot make do with the feed resources available on a typical grazing ranch. The good news is that commercial producers CAN increase profitability by selecting for fertility, longevity, and mothering ability. If she has a calf at the start of the calving season, she will wean a larger calf than if it is born at the end of the calving season, and she's much more likely to be bred at fall preg check.

You will notice that the Reference Sire page hasn't changed much since last year. It's just really hard to move away from something that works. We are positively tickled by the daughters we are getting by all these sires, and we know you will be too. So come check out the bulls and have lunch prepared by Angel and Jaimie Roscoe (Cowboy Dinner Tree). If you can't make it, log onto [LiveAuctions.TV](http://LiveAuctions.TV). We look forward to seeing you!

Aaron & Rebecca

# 17th Annual First Choice Bull Sale

TUESDAY • OCTOBER 10, 2023 • 1 P.M.

At the ranch near Fort Rock, OR

**SALE DAY PHONES:** Aaron Borrer..... (541) 633-3284  
Rebecca Borrer..... (541) 771-4151

**Auctioneer:** Eric Duarte ..... (541) 891-7863

**Representatives:**  
Logan Ipsen, *Western Livestock Journal* ..... (916) 947-2392  
Matt Macfarlane, *California Cattleman* ..... (916) 803-3113  
John Dickinson, Parnell Dickinson, Inc..... (916) 806-1919  
Quannah Gardiner, American Angus Assn..... (620) 635-0294  
Jared Patterson, *Western Livestock Journal*..... (208) 312-2386

**Sale Consultant:**  
Matt Macfarlane, M3 Marketing..... (916) 803-3113  
m3cattlemarketing@gmail.com  
www.m3cattlemarketing.com

**Absentee Bidding:** Please call any of the listed Representatives or Aaron or Rebecca Borrer directly for personal service. You may also preregister and bid online at [www.liveauctions.tv](http://www.liveauctions.tv).

**Sale Location:** 9 Peaks Flat Iron Ranch, East of Fort Rock, OR  
Map on the back cover.

- Recommended Lodging:**  
**LAPINE SALE HEADQUARTERS:**  
**Best Western Newberry Station:** 16515 Reed Rd. & Hwy. 97, LaPine, OR, (541) 536-5130. \$150 plus tax per night, ask for the 9 Peaks Bull Sale Rate.  
**Klamath Falls Motel 6:** 5136 South 6th St., Klamath Falls, OR, (541) 884-2110. Pets stay free.  
**Best Western Olympic Inn:** 2627 S. 6th St., Klamath Falls, OR, (541) 882-9665.  
**Shilo Inn:** 2500 Almond St., Klamath Falls, OR, (800) 222-2244 or (541) 885-7980. Pets with \$25 deposit.

**Lunch:** Angel and Jamie Roscoe of the Cowboy Dinner Tree will prepare a complimentary lunch for sale attendees, served at noon on sale day.

**Transportation:** Upon request, we gladly meet planes landing in Redmond, OR. Alaska, American, Delta and United fly into Redmond. The Bend/Redmond airport is a two-hour drive from the sale location. Private planes will also be met at the Christmas Valley Airport, 30-minute drive from the sale site.

**Bull Delivery:** Free delivery in Oregon and adjoining states with the purchase of two or more bulls.

**Ultrasound Test:** Performed by Matt Lane, Billings, MT.

**Wintering:** Bulls purchased for spring breeding may be kept at 9 Peaks Ranch until April 1, 2024, free of charge. No insurance will be necessary for this period as any loss will be covered under our guarantee.

**Volume Discounts:** 5% off with the purchase of 5 or more bulls by one ranch, 10% off with the purchase of 10 or more bulls by one ranch.

**Retained Ownership:** 9 Peaks Ranch retains a 25% semen interest and revenue sharing in all of the bulls selling through the 2023 9 Peaks Ranch First Choice Bull Sale. Buyers will receive full possession and full salvage value on all bulls purchased.

**Guarantee:** 9 Peaks Ranch guarantees your satisfaction with your purchase through the end of the first breeding season. This guarantee does not cover malnutrition. Young bulls must be cared and fed similarly to young heifers expecting to become pregnant. Any claim must be made in a timely manner. If you have a bull die in the first breeding season for any reason that is not obvious, please have your vet perform a necropsy so that we can determine cause of death. Your claim will result in 9 Peaks providing a suitable replacement bull. If one is not available, your money will be refunded or you will receive a credit in our next sale. Any salvage value will be forwarded to 9 Peaks Ranch.

**Semen Test:** Performed by Rod Ferry, DVM, in September 2023. All bulls selling will be classified as "Satisfactory Breeder" according to the Society for Theriogenology Bull Breeding Soundness Examination standard.

**Herd Health:** The 9 Peaks Herd has had extensive testing for BVD and BLV with no positive results. 9 Peaks Ranch guarantees all bulls to be free of these diseases at the time of delivery. Every bull in the sale has either been tested free of the AM, NH, and CA genetic defect, or is not a potential carrier of these genetic defects.

**Vaccinations:** All bulls have been vaccinated with Vision 8/Somnus, Bovashield, Lepto-vibrio, pinkeye and dewormed. Bulls will be vaccinated for anaplasmosis upon request. If you will need additional or booster vaccinations for bulls wintered at 9 Peaks Ranch, we will vaccinate your bulls prior to delivery.

**Inspection:** The sale bulls may be viewed at any time at 9 Peaks Ranch. Videos of sale bulls will be available in late September at [www.9peaksranch.com](http://www.9peaksranch.com). Satisfaction is guaranteed on any sight-unseen purchases if you discuss your requirements with 9 Peaks Ranch.

**Financing:** Zero % Financing. Bulls left to winter at 9 Peaks Ranch can be financed with 50% due on sale day and 50% due upon delivery by April 1, 2024 with no interest charge.

**ANGUSMEDIA™** EPDs contained in the hard copy of this sale book were current as of print date. Digital versions of this sale book can be viewed online at [www.angus.org](http://www.angus.org) and will have EPDs updated every Friday with the exception of EPD references in footnotes and photos. Any PDF downloads from the website will contain EPDs current as of the date downloaded. References: American Angus Association®, AHIR®, AngusLink™, CAB®, Pathfinder®.

**DRIVING DIRECTIONS:** Please don't rely on your GPS navigator. It will take you down all kinds of inappropriate roads out here!

**From Redmond/Bend/LaPine:**  
From US-97 North of Lapine, turn east onto OR-31  
Go 29.2 miles to Fort Rock Road, the Fort Rock/Christmas Valley turnoff, turn east.  
Go about 6 miles to Fort Rock.  
Continue east. At 6 miles east of Fort Rock, continue EAST at the sweeping turn onto Derrick Cave Road. Do NOT go South on the Christmas Valley Highway.  
Go 2.2 miles and follow the pavement NORTH along Derrick Cave Road. There is a dirt track through the desert BLM land that appears to be a short cut. You will see a hay pivot and our hay barns about a mile straight ahead. It is a shortcut, if you're on horseback. Otherwise, it's faster to go around.  
Go about a mile, and follow the pavement EAST on Derrick Cave Road.  
Go another mile, and continue straight (east) under the power transmission lines, onto Morrison Lane. This is a good, two lane graded gravel road. (The paved road leads north to our Derrick ranch.)  
Go one mile east on Morrison Lane, and then turn SOUTH on Oil Dri Road. (If you are ever turning south on pavement, you are not in the right place!)  
Go one mile south on Oil Dri Road. Then turn WEST at the 9 Peaks Ranch sign.

**From Lakeview/Highway 31**  
From Paisley, go 47 miles northwest on Highway 31 over Picture Rock Pass.  
Turn north (right) onto Old Lake Road.  
Go 4.4 miles on Old Lake Road and turn north (left) onto Oil Dri Road.  
Go 13.8 miles north on Oil Dri Road, continue through THREE 90-degree turns (first W, go 1.5 miles; then N, go 1.5 mi; then W again).  
Turn off on to Flat Iron Ranch is about 1.5 miles W of last 90-degree turn.

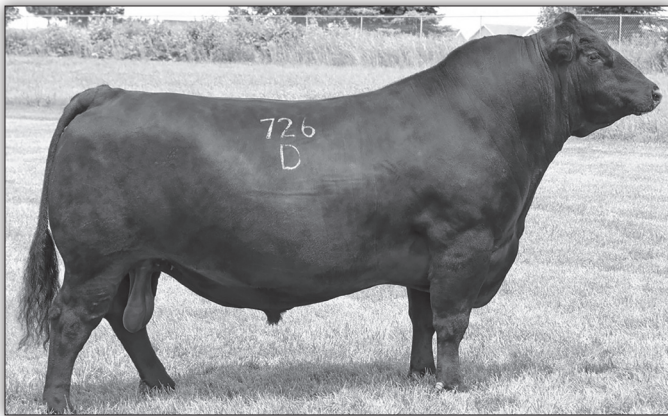

**From Klamath Falls**  
Go north on Highway 97 45 miles to Silver Lake Road/Klamath Marsh.  
Turn east (right) onto Silver Lake Road. The name changes to Bear Flat Road with no turn. Go 50 miles to Highway 31 in Silver Lake.  
Turn east (right) on Highway 31 and go 11 miles to Old Lake Road.  
Turn north (left) onto Old Lake Road and go 4.4 miles to Oil Dri Road. Turn north (left) on to Oil Dri road.  
Go 13.8 miles north on Oil Dri Road, continue through THREE 90 degree turns (first W, then N, then W again).  
Turnoff to Flat Iron Ranch is about 1.5 miles W of last 90-degree turn.

We bought 804 with Lucky 7 Angus of Wyoming out of Snyder's Bulls For The 21st Century test and sale. 804 was the high ADG, best feed conversion, and best RFI (feed efficiency) bull of his contemporary group. We've developed sons for 3 years now, and they are always the high gain sire group on test. 804 is an outstanding heifer bull whose calves come easy and vigorous. He is a sound-made, good footed, easy fleshing fellow that is nice to handle. Carcass traits are outstanding. We've calved 804 daughters for 2 years now, spring and fall groups, where his daughters have met our high expectations—fertility, udders, calving ease and mothering ability are all outstanding. Several influential cattlemen from Australia and New Zealand "found" 804 based on his structural soundness at World West Sire Services in Montana, and followed up with semen exports because his EPD profile stood out as well. His popularity is increasing as he becomes more proven.

Stellar is a low birthweight bull with excellent growth traits. He is a breed leader for foot structure EPDs. We are impressed with the udders and mothering ability of the Stellar daughters. Stellar is siring cattle with good fleshing ability and a milk EPD that will work for programs that need to keep milk production moderate. PAP is outstanding.

Owned with Bill Barboni. We used Recharge, a full brother to Resource, in 2017 and have appreciated the structural soundness, foot quality, muscle, docility, and fleshing ability of his calves. We retained AI breeding and summer season turnout rights on Blitzen. Blitzen is truly a "Power Bull," transmitting growth and muscle onto moderate framed offspring. Blitzen's Pathfinder award winning dam Entella B881 also produced herd sire 9 Peaks Lightning. Blitzen daughters have made great cows, and they are among the easiest fleshing females we have ever raised.

Owned with Bill Barboni. We bred Blitzen's dam B881 to Resource when we couldn't source any more Recharge semen, and the resulting calf was Lightning, the impressive 2nd high seller from 2020. Aaron thinks Lightning is one of the most impressive "power bulls" that we have used in the last several years, and we are continuing to use him by AI and natural service. Lightning offers similar growth, muscle, structural soundness and moderate frame as his brother Blitzen but with more moderate birthweight genetics. The first Lightning daughters have been calving this fall both here and at Bill Barboni's in Petaluma. They have beautiful udder structure with small teats and are making excellent mamas.

Rainfall is a heifer bull that will reduce frame size in most herds, with good enough growth and carcass traits to keep current. He sires very sound structured, good footed cattle. He is a high fertility bull with excellent scrotal circumference and heifer pregnancy EPDs. His daughters are well known for their soundness, fleshing ability and good udders. We used Rainfall on some higher growth, bigger cows in our herd and you will be impressed with the results.

Cool sold as a yearling in 2014 as one of the top \$Beef prospects that year. The bull turned out to be a breed leader for exceptional docility and fertility. Scrotal circumference and Heifer Pregnancy EPDs are both in the top 5% of the breed with many sons and daughters reported. Cool is a moderate birthweight bull with a very good Calving Ease Direct EPD. The bull has been used heavily natural service, several years running, at Big Dry Angus in Montana, where the cattle graze extensive rangeland. Cool daughters have qualified their sire for the Pathfinder award, as they raise good calves and breed back very well.

Donner and Blitzen were two outstanding S A V Recharge sons that Bill Barboni bought in the 2019 sale. We used these bulls both AI and natural service. They excel at structural correctness, especially foot quality, and maternal strength. Donner's dam raised 13 calves at an outstanding 110 average weaning ratio. We are proud of our Donner daughters as they are some of the best females we have ever raised. We lost Blitzen this year, and Donner two years ago. We are continuing to use both bulls by AI.

### \$Beef Is A Terminal Index

We're all for creating end product value. We were involved with some of the first structured carcass sire evaluations, as well as implementing ultrasound carcass data as a selection tool well before the Angus Association adopted its use in creating carcass EPDs. However, \$Beef is "Improved" with increased growth, increased carcass weight and decreased back fat, all of which are antagonistic to an efficient mama cow. One major tenet of our breeding program is to create cattle that balance production/output with maintenance/input costs.

*A larger cow will raise a bigger calf than a smaller cow, right? Not necessarily! Consider this data from North Dakota State University Dickinson Research Center: Cows were separated into three groups based on their mature weight: the light group 1,200 pounds or lighter, medium group 1,300 pounds, large group 1,500 pounds and heavier. On average, the small cows' calves weaned at 617 pounds, the medium at 589 pounds, and the large cows' calves weaned at 572 pounds. Not only that, but the difference in feed requirements for 50 cows, from the large group to the small group, is 23 tons! Do you want to buy extra winter hay (and have lower summer stocking rates) to raise lighter calves? If not, be sure to keep an eye on mature weight and height EPDs on the bulls you buy.*

# 9Δ FALL YEARLINGS

*We have been measuring both height and weight of our mature cows for over 30 years. If you want to keep a lid on mature size in this era of higher growth genetics, use the MW and MH EPDs listed on all of the bulls. Breed average for MH is +0.3. Bulls below 0.0 will reduce mature frame in most herds.*

*We do not trim hooves on any cattle at 9 Peaks Ranch. Trimming feet before a bull sale can be a deceptive practice and is at best a short-term fix. We believe in showing our customers what the cattle really are, and letting our customers select their bulls with full information. We do cull bulls and heifers as they develop if we see a problem.*

# EXPLANATION OF EPDs

Expected Progeny Difference (EPD), is the prediction of how future progeny of each animal are expected to perform relative to the progeny of other animals listed in the database. EPDs are expressed in units of measure for the trait, plus or minus. Interim EPDs may appear on young animals when their performance has yet to be incorporated into the American Angus Association National Cattle Evaluation (NCE) procedures. This EPD will be preceded by an "I", and may or may not include the animal's own performance record for a particular trait, depending on its availability, appropriate contemporary grouping, or data edits needed for NCE.

## GROWTH

**Calving Ease Direct (CED)**, is expressed as a difference in percentage of unassisted births, with a higher value indicating greater calving ease in first-calf heifers. It predicts the average difference in ease with which a sire's calves will be born when he is bred to first-calf heifers.

**Birth Weight EPD (BW)**, expressed in pounds, is a predictor of a sire's ability to transmit birth weight to his progeny compared to that of other sires.

**Weaning Weight EPD (WW)**, expressed in pounds, is a predictor of a sire's ability to transmit weaning growth to his progeny compared to that of other sires.

**Yearling Weight EPD (YW)**, expressed in pounds, is a predictor of a sire's ability to transmit yearling growth to his progeny compared to that of other sires.

**Yearling Height EPD (YH)**, is a predictor of a sire's ability to transmit yearling height, expressed in inches, compared to that of other sires.

**Scrotal Circumference EPD (SC)**, expressed in centimeters, is a predictor of the difference in transmitting ability for scrotal size compared to that of other sires.

## MATERNAL

**Heifer Pregnancy (HP)**, is a selection tool to increase the probability or chance of a sire's daughters becoming pregnant as first-calf heifers during a normal breeding season. A higher EPD is the more favorable direction and the EPD is reported in percentage units.

**Calving Ease Maternal (CEM)**, is expressed as a difference in percentage of unassisted births with a higher value indicating greater calving ease in first-calf daughters. It predicts the average ease with which a sire's daughters will calve as first-calf heifers when compared to daughters of other sires.

**Maternal Milk EPD (Milk)**, is a predictor of a sire's genetic merit for milk and mothering ability as expressed in his daughters compared to daughters of other sires. In other words, it is that part of a calf's weaning weight attributed to milk and mothering ability.

**Mature Weight EPD (MW)**, expressed in pounds, is a predictor of the difference in mature weight of daughters of a sire compared to the daughters of other sires.

**Mature Height EPD (MH)**, expressed in inches, is a predictor of the difference in mature height of a sire's daughters compared to daughters of other sires.

**Cow Energy Value (\$EN)**, expressed in dollar savings per cow per year, assesses differences in cow energy requirements as an expected dollar savings difference in daughters of sires. A larger value is more favorable when comparing two animals (more dollars saved on feed energy expenses). Components for computing the cow \$EN savings difference include lactation energy requirements and energy costs associated with differences in mature cow size.

## MANAGEMENT

**Docility (Doc)**, is expressed as a difference in yearling cattle temperament, with a higher value indicating more favorable docility. It predicts the average difference of progeny from a sire in comparison with another sire's calves. In herds where temperament problems are not an issue, this expected difference would not be realized.

**Claw Set EPD (Claw)**, is expressed in units of claw-set score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal claw set. The ideal claw set is toes that are symmetrical, even and appropriately spaced.

**Foot Angle EPD (Angle)**, is expressed in units of foot-angle score, with a lower EPD being more favorable indicating a sire will produce progeny with more ideal foot angle. The ideal is a 45-degree angle at the pastern joint with appropriate toe length and heel depth.

## CARCASS

**Carcass Weight EPD (CW)**, expressed in pounds is a predictor of the differences in hot carcass weight of a sire's progeny compared to progeny of other sires.

**Marbling EPD (Marb)**, expressed as a fraction of the difference in USDA marbling score of a sire's progeny compared to progeny of other sires.

**Ribeye Area EPD (RE)**, expressed in square inches, is a predictor of the difference in ribeye area of a sire's progeny compared to progeny of other sires.

**Fat Thickness EPD (Fat)**, expressed in inches, is a predictor of the differences in external fat thickness at the 12th rib (as measured between the 12th and 13th ribs) of a sire's progeny compared to progeny of other sires.

## \$VALUE INDEXES

\$Value indexes, are multi-trait selection indexes to assist beef producers by adding simplicity to genetic selection decisions. \$Values are reported in dollars per head, where a higher value is more favorable. The \$Value is an estimate of how future progeny of each sire are expected to perform, on average, compared to progeny of other sires in the database if the sires were randomly mated to cows and if calves were exposed to the same environment.

**Maternal Value (\$M)**, an index expressed in dollars per head, predicts profitability differences in progeny due to genetics from conception to weaning.

**Beef Value (\$B)**, an index value expressed in dollars per head, is the expected average difference in future progeny performance for post-weaning and carcass value compared to progeny of other sires.

**Combined Value (\$C)**, an index expressed in dollars per head, includes all traits that make up both \$M and \$B with the objective that commercial producers will replace 20% of their breeding females per year with replacement heifers retained within their own herd.

## COMMITMENT.

Raising quality registered Angus cattle takes commitment. As your genetic supplier, we take that seriously.

That's why we participate in MaternalPlus®. Through MaternalPlus, we devote extra time to tracking maternal traits beyond those normally required, ultimately targeting greater performance and predictability.

The data we choose to gather through this inventory-based program today sets the stage for reproductive and lifetime productivity tools tomorrow — tools to pioneer new ways of selecting the most profitable animals.

Herd improvement starts with smart decisions. A commitment to the female starts with MaternalPlus.

# YOU'VE EARNED IT

You've made a significant investment in your genetics, but does the market recognize that? The AngusLink<sup>SM</sup> Genetic Merit Scorecard was created to objectively describe the genetic merit of your feeder calves. The scorecard gives buyers the confidence they need to pay more for your quality calves.

In 2022, users of the Genetic Merit Scorecard earned a **\$12.94/CWT PREMIUM** on average. Give us a call and we can help you earn what you deserve.
